STRAP CHANGING GUIDE

FORK TOOL

STANDARD SPRING BAR

1. From the backside of the watch, insert forked end of tool between the edge of the strap and the lug/horn.
2. Engage spring bar end and push/pull back on it to release from the lug/horn.
3. Remove spring bar from end of bracelet/strap, place in your new Shinola strap.
4. Insert one end into the hole on the inside of the lug/horn.
5. Use forked end of tool to hold back spring bar end while sliding the strap into position.
6. Release spring bar with tool and make sure the end inserts into the hole.

The Black Blizzard watch and bracelet are made from solid titanium, which possesses superior anti-corrosion qualities, while also being lightweight, strong, and hypoallergenic. Through exposure to oxygen, titanium forms a protective titanium oxide layer, which naturally darkens the metal. Although this layer may occasionally scratch off to reveal the underlying layer, these scratches can be easily touched up with a fiberglass pen.
